Excited to share that I got selected for CODEVERSE 2.0 Hackathon!
Today was the aptitude test, and it went pretty well!

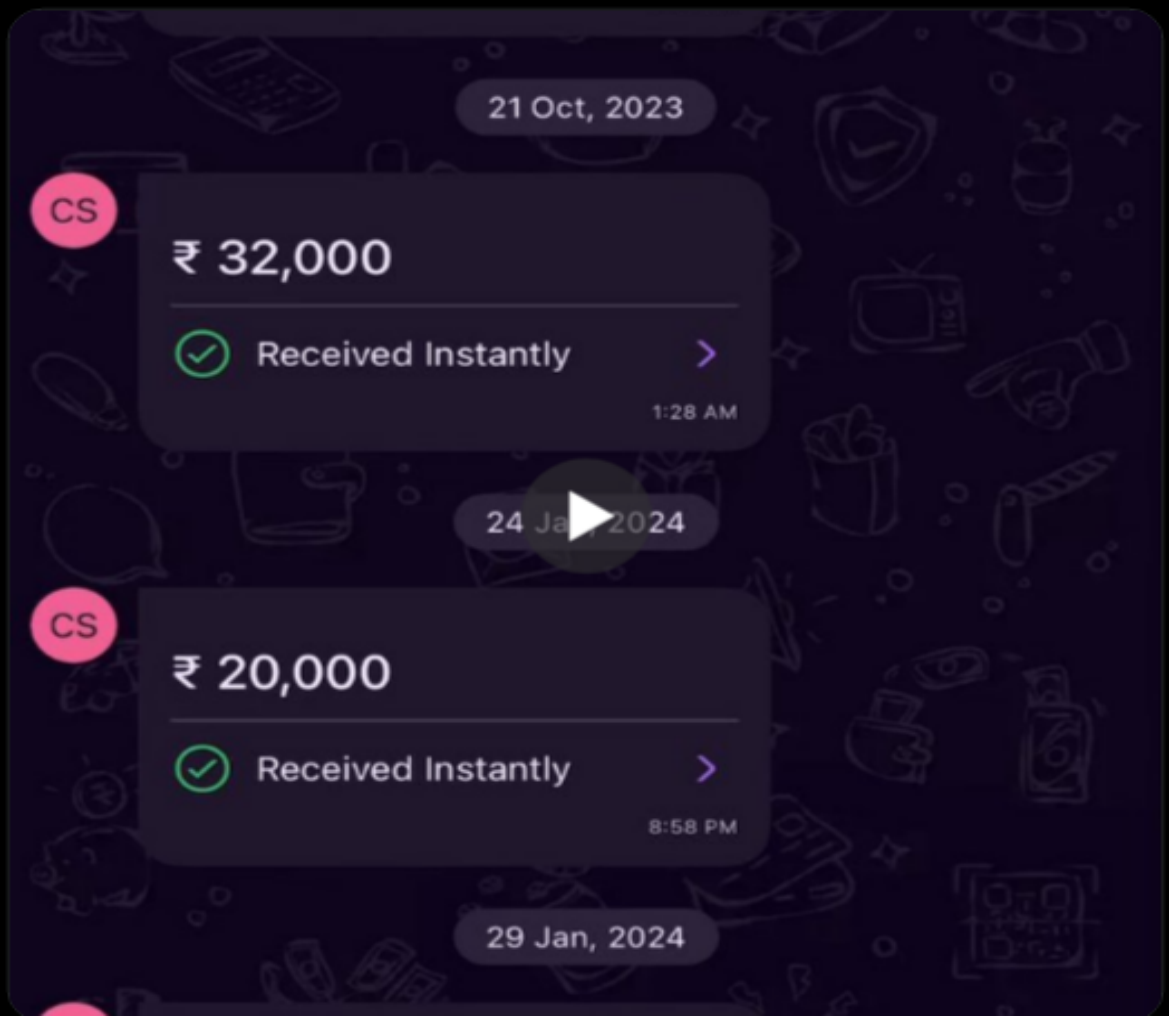
For you Following

Hey, Just want to share this how small things led to big once. I got my first freelance project on May 7th, 2023. The same client gave me multiple additional projects and even introduced me to another client, with whom I also did great business.


PS: I am still working with them.
